---

Following up here ... the PA/SI report for Picatinny was submitted to us on 3/22/21. We're still reviewing so don't have a finished date yet but I would project maybe July 2022 to have the final report done (after we submit our RTCs and it goes through Army review).

For BNL, I would say that our equivalent report would be the Phase 4 Characterization report – it was the first dedicated, comprehensive PFAS report (Phases 1-3 were documented in the Groundwater Status Report). That was submitted on 2/22/21. I don't think we submitted comments on it but we moved to approve the TCRA on 8/9/2021 (submitted June 4 2021) so not sure what date is best here.

**Subject:** SEMS Data for PFAS

Also if you have PA/SI reports for Basewide PFAS work at your site could you send the Start Date and Completion date for the report. Don't go crazy. I know a lot of these AOCs get funky with regards to the documents and we are now in RIs for some of them. So we are already tracking PFAS info.

Thanks,

doug
